

# Cerberus ECO Integration Module

The Cerberus ECO integration module allows sharing information about events and alarms between the Cerberus ECO fire alarm systems and the Intellect PSIM, enabling creation of AxxonSoft-powered security systems that consolidate diverse components in a single software interface.

Cerberus ECO is an addressable FSA for small and mid-sized businesses, such as: hotels, retail shops and housing. Cerberus ECO offers high-reliability fire detection and maximum protection for people, property and assets.

## The Cerberus ECO integration module allows:

- Monitoring of Cerberus ECO
- Control and Management of Cerberus ECO

ACFA Intellect now supports Cerberus ECO FC1840-A3 Fire Alarm Controller, FDO181 Addressable Smoke Detector, FDT181 Addressable Heat Detector, FDCI181-2 и FDCIO181-2 Addressable Input/Output Modules and FDCL181 Line Separator.

## Here are all basic events integrated:

- Fire alarm
- Trouble
- Supervision
- Activation/Confirmation

## Possible alarm response scenarios are:

- Manual and Automatic Control / Reconnect
- Reset/Acknowledge/Silence the buzzer
- Check
- Set Time and Disable Test.

## Note:

For detailed information on Cerberus ECO, please refer to the vendor's website: <http://www.siemens.com/entry/cc/en/>
